

Hey FCC

Enough of your shilly-shallllying with the big broadcasters. XM Radio is a huge technological advance, and it needs NOT to be disadvantaged by the entrenched broadcasting interests.

You've already done enough for Rupert Murdoch and the megabroadcasters -- give XM radio and its MILLIONS of subscribers a break -- give us local weather, news, and the other necessities of life.

And by the way, the sweetheart deal you cut with Murdoch, Clear Channel and the other favored few is front and center with a LOT of Americans. Powell should resign in disgrace, and the sooner the better.

Have a nice day.

Robert Maynard
